New Exec!

The exec of 2025 have done a wonderful job establishing the team and have made amazing progress in our first year doing this project. With the new exec, this will be another year of great progress in the team!

Team Lead	From Kate Dalrymple	To Lauren Nesbitt & Deputy Sofia Millan Arkwright
Mechanical Lead	From Joe Cashin and Marcus Merritt	To James Mounfield & Deputy Loki Konstant-Hambling
Electrical Lead	From Katrina Lia	To Rufus Murray & Deputy Lim
Business Lead	From Winona Dalugdugan	To Elena Bromidge and Deputy Lottie Gribbon

Mechanical Team

3 new subgroups!

With the handover to the new exec, the mechanical team has decided to make three new subteams, the Prototyping & Manufacturing team, Redesign team, and Instrumentation Specialist team. The aims of these teams are to ensure the prototype parts are correctly machined and assembled, explore new concepts for our design and to ensure all our inventory and equipment are organised and easily accessible for our mockloop.

Electrical Team

New software subteam!

Under the supervision of the new exec, the electrical team is dedicating a team to developing a monitoring software for our heart, the end aim is to have an app that would monitor the patients vitals and the efficiency and condition our artificial heart, as well as control the motor so the heart rate could be dynamic. In the short term the aim is to develop and code a software to monitor and control the mock circuit loop.

Business Team

Our first team dinner!

On the 22nd of January we are having a team dinner to celebrate all our achievements from 2025 and properly thank the old exec while welcoming in the new. Professor Ashraf has a speech prepared to officially congratulate last years exec and it promises to be a night full of camaraderie and team spirit.

Thank you!
